THE RIGHT SAMPLING LINE FOR EVERY PATIENT

Microstream™ Advance Filter Lines
Microstream™ Luer Sampling Lines

Medtronic
Further, Together

Introducing the new Microstream™ Advance filter line and Microstream™ Luer sampling line portfolio

We continuously strive to enhance our products and technologies for you and your patients. And we've done it again. Medtronic is pleased to introduce the Microstream™ Advance filter lines and Microstream™ Luer sampling lines portfolio.

It's the little things that create the biggest impact for your patients. From how a device touches their skin to the sounds in their rooms to the smells that remind them they are away from home. That's why we redesigned our capnography sampling lines — with the patient in mind.

The new sampling lines still have the reliability and accuracy you've come to expect from Microstream™ technology — but with an improved neutral scent and soft, kink-resistant tubing.

Additionally, the drying element on long duration sampling lines has been moved further down the tubing and away from the patient's face. The new placement maintains the integrity and trusted drying performance of our long duration sampling lines.

Product packaging enhancements to the Microstream™ capnography portfolio of sampling lines include:

- Redesigned packaging for enhanced usability and instructions for proper sampling line placement
- New product naming structure and order codes updated to be more intuitive for easily identifying the right sampling line for the right patient

TERMINOLOGY

CATEGORY:	MV (Microstream™ Advance Filter Line) ML (Microstream™ Luer Sampling Line)
SIZE:	A (Adult - includes Adult-Pediatric and Adult-Intermediate) P (Pediatric only) I (Infant/Neonatal)
SAMPLING LINE TYPE:	I (Intubated) B (Guardian Bite Block) N (Nasal) C (Carinal) M (Mask)
OXYGEN:	O (with oxygen)
HUMIDITY:	HH (High Humidity) H (Humidity)
LENGTH:	L (Long) XL (Extra long)
QUANTITY:	100u indicates box of 100

Microstream™ capnography sampling lines

SAMPLING LINE PORTFOLIO

- **Microstream™ Advance filter lines** for use with Microstream™ capnography monitors and multiparameter monitors equipped with Microstream™ technology
  - – Orange connectors designate short-term use
  - – Yellow connectors designate use for extended duration
- **Microstream™ Luer sampling line (blue connector)** for use with most types of sidestream monitors with a standard luer input connector

CONNECTORS

Orange Connector
Short-term use Microstream™ Advance filter line: Quick-seal connection with a single twist, for a tight seal to the monitor

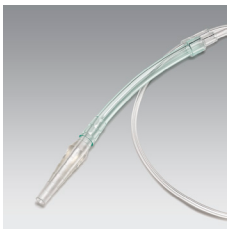

Yellow Connector
Extended duration Microstream™ Advance filter line: Quick-seal connection with a single twist, for a tight seal to the monitor

Blue Connector
Microstream™ Luer™ sampling line

INTEGRATED OXYGEN CONNECTORS
